Tyler Dove

303-912-7536 | j.tyler.dove@gmail.com | https://jtylerdove.github.io

Skills

- **CAD Design -** Revit, AutoCAD, Civil 3D, SolidWorks, Fusion 360, SketchUp
- **Bluebeam**
- **Adobe InDesign**
- **3D Manufacturing –** SLS, SLA, and FFF format printers (powder, resin, and filament-based)
- **Microsoft and Google Suites**

Education

Vanderbilt University - Spring 2028

- **Bachelor of Science in Civil Engineering | Digital Fabrication Minor | Innovation and Design Strategy Minor**
- **3.9 GPA**
- Traveling member of men's club soccer team
- Active member of the American Society of Civil Engineers (ASCE)
- Active member of the Vanderbilt architecture society

Boulder High School - Graduated 2024

- Honor Society
- AP Scholar with Distinction Award
- Two-year captain of men's soccer

Experience

Impressio Technology Engineering Internship | 2026

- Supported product development through its full lifecycle, including design, prototyping, testing, and manufacturing.
- Collaborated with clients, including the Denver Police Department and the United States Army, to develop products.
- Operated and maintained professional 3D manufacturing and testing equipment.

Negative Design Co. Product Design & Marketing Internship | 2026

- Designed and developed multiple products under the Negative Design Co. product portfolio and intellectual property.
- Developed and executed digital advertising campaigns to promote products and expand brand visibility.
- Identified and engaged prospective retail partners, expanding the company's network of wholesale clients.

ASCE Sustainable Solutions Competition | 2025

- **ASCE Mid-South Regional 2nd place overall design, 1st place in sustainability.**
- Led the design process and modeling of a proposed data center site for the ASCE Sustainable Solutions Competition.
- Developed innovative strategies to meet renewable energy, sustainability, and regulatory requirements.

Susan Gray School Playground Design | 2025

- Led the design process for a new accessible playground structure at the Susan Gray preschool.
- Applied design principles to a client-oriented project, balancing real-world constraints with user-centered design objectives.

Atkinson Noland & Associates Engineering Internship | 2025

- Collaborated with structural engineers on historical preservation and building rehabilitation projects.
- Assisted with design modeling, engineering analyses, and construction document markups.
- Performed field investigations at active construction sites and performed subsequent lab testing.
